

1

Multiple choice 1 point Question

What type of phrase is "The Text Mining Course"?

- ☐ Prepositional Phrase (PP)
- ☐ Verb Phrase (VP)
- ☐ Adjective Phrase (AdjP)
- ☒ Noun Phrase (NP)

2

Multiple choice 1 point Question

What is the difference between dependency parsing and constituent parsing?

- ☐ A dependency parser detects hierarchical relations such as noun phrases and verb phrases, a constituency parser detects flat relations between adjectives, nouns and verbs.
- ☐ There is no difference
- ☐ A dependency parser detects relations between morphemes, a constituency parser detects relations between parts-of-speech
- ☒ A dependency parser detects flat relations between adjectives, nouns and verbs, a constituency parser detects hierarchical relations such as noun phrases and verb phrases.

3

Multiple choice 1 point Question

What are chunkers?

- ☐ Chunkers provide provide phrase structure trees robust and efficiently, but do not handle syntactic dependencies.
- ☐ Chunkers provide an efficient way identify compound nouns in languages such as English (where they are not written as one word, unlike Dutch and German), but no further syntactic information.
- ☐ Chunkers provide the same information as a parser, but are more robust and have a lower precision.
- ☒ Chunkers provide constituents robust and efficiently, but no full sentence structure

4

Multiple choice 1 point Question

What is the lexical relation between 'lecture room' and 'university building'?

- ☐ synonymy
- ☐ homophony
- ☒ meronymy
- ☐ hyponymy

5

Multiple choice 1 point Question

Syntactic parsers and chunkers are natural language processing modules used for which of the following?

- ☐ Morphology
- ☒ Syntax
- ☐ Semantics
- ☐ Pragmatics

6

Multiple choice 1 point Question

What is the primary difference between semantics and pragmatics in linguistics?

- ☒ Semantics deals with the literal meaning of words, while pragmatics focuses on how context influences meaning
- ☐ Semantics is concerned with sentence structure, while pragmatics is about sentence correctness
- ☐ Semantics is related to word order, while pragmatics deals with syntax rules
- ☐ Semantics focuses on language evolution, while pragmatics is concerned with language in isolation

7

Multiple choice 1 point Question

Which of the following is an example of a morphological process?

- ☐ Changing word order to form a question
- ☒ Adding a prefix to a word to alter its meaning
- ☐ Using context to determine word meaning
- ☐ Applying tone or stress to modify word meaning

8

Multiple choice 1 point Question

Which of the following processes involve changes to a word's grammatical features, such as tense or number?

- ☒ Inflection
- ☐ Derivation
- ☐ Compounding
- ☐ All of the above

9

Multiple choice 1 point Question

In dependency grammar, what term refers to the relationship between a head word and the words that depend on it within a sentence?

- ☐ Coordination
- ☐ Subordination
- ☒ Dependency relations
- ☐ Agreement relations

10

Multiple choice 1 point Question

Which of the following describes the difference between metaphors and metonymy in pragmatics?

- ☐ A metaphor substitutes one word for another based on association, while metonymy compares two unrelated things
- ☒ A metaphor creates a comparison between two distinct things, whereas metonymy replaces one word with another that is conceptually related
- ☐ A metaphor refers to literal meanings, while metonymy involves abstract concepts
- ☐ A metaphor always involves exaggeration, while metonymy involves understatement
